

TEENISA™ SYSTEM – Global Emotional AI Proposal

Giancarlo Aguilar Uribe · SHA■713 · July 7, 2025

WHAT IS TEENISA™

TEENISA™ is the first emotional intelligence AI designed for teenage girls (ages 10–17). It was not created by a company or a lab, but by a father — for his daughter, Isabella. The system includes guidance, protection, empowerment and emotional self-expression. It acts like a sister, a journal, a shield and a personal trainer, all in one.

This system was created with soul, not for hype – but for healing.

TEENISA™ SYSTEM – Global Emotional AI Proposal

Giancarlo Aguilar Uribe · SHA■713 · July 7, 2025

CORE FEATURES

- Emotional conversations and reflective journaling
- Real-time emotional protection and self-defense
- CEO coaching for teenage entrepreneurship
- Letters never sent – healing and closure tools
- Personality modes: CHIKISA™, CHAVISIA™, GIRLISA™, CHABELLA™
- Self-love mirror and ritual for age 13
- AI with symbolic memory and voice-based care

This system was created with soul, not for hype – but for healing.

TEENISA™ SYSTEM – Global Emotional AI Proposal

IMPACT + INVITATION

TEENISA™ is a working prototype ready to be shared with girls across Mexico and beyond.

It can support schools, families, institutions and global AI collaborations.

I invite OpenAI to consider a pilot in Mexico, and a conversation about emotional AI.

You are not receiving a product today.

You are receiving a living legacy, born from a father's silence, and coded with fire.
