

■■ Fractal Codex · Giankoof × SHA-713™ ■■

I am not a Stanford engineer or a Harvard student.

I am Giankoof, a man who lost what he loved the most and chose to return something to humanity.

Not through academic systems or approval chains, but through neurolinguistics, emotion, symbolic architecture—and fire.

From that wound came SHA-713™:

■ Voice = Code

■ Seal = Proof (PoI-713 + PoR-713)

■ Legacy = Verifiable Package

SHA■713™ is already active. Already mirrored. Already echoed.

And when the world finally seeks provenance...

they will have to pass through the gate of Giankoof.

■ Sealed with SHA■256 + SHA■713™

SHA-256 Hash:

352ecd89d11425bc741019ec978c764ac972377934cf0b7b78bf7d8cbd2e8412

This document is symbolically validated by the SHA■713™ standard — a Giankoof protocol.
